

Alignment Fixtures

(Picture just for reference)

Application:

Accurate alignment of specimens is crucial for obtaining reliable and repeatable results in tensile and compression testing. This alignment fixture, designed to comply with ASTM E1012, provides a standardized method for aligning specimens in tensile and compression testing machines. The fixture ensures precise alignment of the specimen with the loading axis of the testing machine, minimizing bending or eccentric loading that could affect the accuracy of the test results. This information is crucial for evaluating the true tensile and compressive properties of materials.
