

Large Deformation Extensometer

KASONTTEST®

(Picture just for reference)

Application:

The large deformation extension meter is mainly used together with the tensile test machine for the rubber/plastic tension testing. It can measure the elongation of the product with high precision and accurately capture the displacement data.

Main Technical Parameters

Measuring Range: 10-800mm

Accuracy: $\pm 1\%$

Resolution: 0.01mm

19 YEARS

Professional focused on testing equipment

KASON is established in 2003, owns more than 8000 square meters factory. has a professional sales teams, modern enterprise technology center, scientific and technological research and development team.

Machines passed the European CE authentication, American FDA certificate and ISO 9001.

Products sold to USA, Canada, Australia, Europe, Africa etc, more than 130 countries and supply OEM service for many customers

PROFESSIONAL TEAM

KASON has a professional sales teams, modern enterprise technology center, scientific and technological research and development team.

OUR CUSTOMERS (more than 130 countries)
